About Us

NSD© is a Part of New Star Group having legacy of 50 years in entrance automation manufacturing different types of roller shutters for both residential and commercial purposes. With 50 years of experience in manufacturing, NSD© provide durable roller shutter designs and unmatched technical support.

NSD© work closely with all aspects of sizing, material selection, delivery, installation and warranty service to ensure property and business owners have a product that will provide them with a lifetime of security, protection, privacy and energy savings. Contact us today to experience the NSD© difference.

Residential Roller Shutters

Roll-Up Garage Doors

NSD's High-Speed Doors excel with advanced features, featuring a secure seal, wireless safety system, and durable components. Ideal for interior and exterior applications, they minimize downtime, addressing the needs of manufacturing, warehousing, parking, coolers, and cold storage.

Roll-Up Window Shutters

Elevate your outdoor experience with our versatile privacy screens for pergolas and windows. Stylish and durable, these premier screens offer optimal protection from the elements, ensuring enjoyment in any weather. Crafted from moisture and heat-resistant materials, they provide privacy with controllable visibility and protection from sunlight, all while safeguarding against insects and pests.

Transparent Shutters

NSD's contemporary pergola system redefines outdoor living, seamlessly transitioning between sunny and rainy weather with its movable/folding and self-rotating panels. Tailored to suit diverse outdoor environments, it offers unparalleled visual and thermal comfort for a modern and adaptable outdoor experience.

Privacy Screens

NSD's fire-rated shutters are essential for preventing the spread of fire in industrial and commercial spaces. Designed to contain flames to their origin, these shutters enhance safety and minimize damage. Ideal for areas requiring fire-resistant features, NSD's fire shutters offer crucial protection and peace of mind in the event of a fire.

Commercial Roller Shutters

Roll-Up Security Shutters

Discover NSD's roll-up garage doors, seamlessly blending modern aesthetics with durability. Effortlessly rolling up, they maximize space efficiency. Crafted from premium insulated aluminum, NSD's doors enhance energy efficiency, providing a stylish and eco-friendly solution for your garage. Elevate both form and function with our innovative design.

Fire Shutters

NSD's roller shutters go beyond sun protection, providing thermal and sound insulation while enhancing burglary protection. They effectively shield windows from wind and weather. With NSD's contemporary designs, appealing aesthetics, and versatile installation modes, these shutters offer solutions for any project.

Roll-Up Perforated Shutters

NSD's commercial roller shutters prioritize security with advanced and robust materials. Designed for commercial spaces, they offer customizable options and a contemporary design, ensuring a perfect blend of functionality and security.

High Speed Doors

Versatile for residential and commercial use, NSD's awnings offer stylish protection against sun, rain, and snow. The sleek design complements diverse spaces, providing comfort and functionality in various weather conditions.

Door Anatomy

New Star Doors are always made-to-measure and built with you in mind. We want you to get the most from your garage, and believe that it deserves the thought and attention paid to the rest of the home.

Made To Measure

Your door space is surveyed and precisely measured by a local New Star Door engineer. Our Yorkshire factory then makes the door to your exact specification in just a few weeks.

Integrated Heavy-Duty Motor

Maintenance-free tubular motor neatly concealed within the steel barrel. Torques rise from 40nm to 80nm for our bigger doors.

Auto Lock

Garolla doors lock automatically. No key. No bending over. When locked in place, the door cannot be lifted manually. Garolla doors lock automatically. No key. No bending over. When locked in place, the door cannot be lifted manually.

Secure Guide Rails

ensuring a straight and secure close. For wider and taller doors, deeper guide rails provide added durability and weatherproofing.

Toughened Steel Barrel

Loadbearing strength. Close the door, and the octagonal barrel rotates downwards. Open the door and it raises the slatted curtain and connects to the aluminum end caps. construction.

Slat Anatomy

New Star Doors slats are constructed from double- skinned aluminum, insulating high-density polyurethane and weather protective polyamide coating. Slats are 55mm or 77mm tall and come in thicknesses up to 19mm for greater sound proofing, temperature control and durability. Our powder coating paint process adds long-lasting surface toughness too.

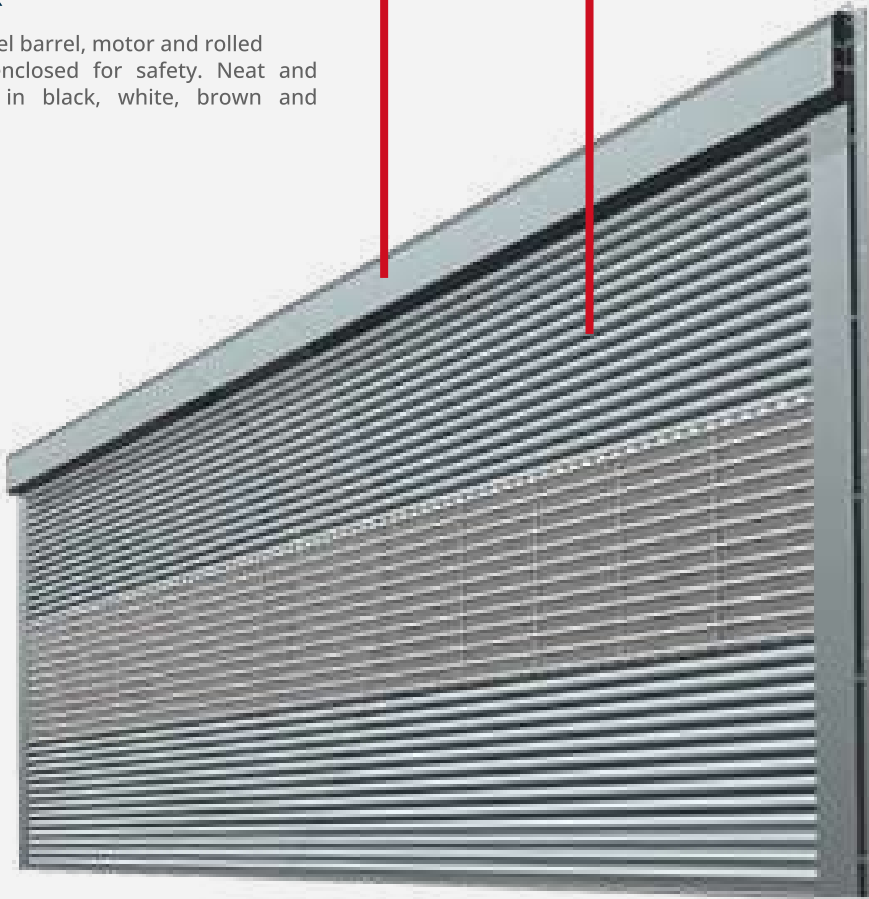

Door Anatomy

Enclosed Aluminum Top Box

Protects the steel barrel, motor and rolled curtain. Fully enclosed for safety. Neat and tidy. Available in black, white, brown and anthracite.

Aluminum Curtains

The interlinked slats that form the garage door. Made of durable aluminum and high-density polyurethane filling.

Anti-Clone Remote Control

Open and close within 20m of your garage with a one-touch remote control. Simple and easy, just one press of a button.

Control Box

Easily open and close the door from inside your garage.

Enclosed Aluminum Top Box

Protects the steel barrel, motor and rolled curtain. Fully enclosed for safety. Neat and tidy. Available in black, white, brown and anthracite.

Weatherproof Seal

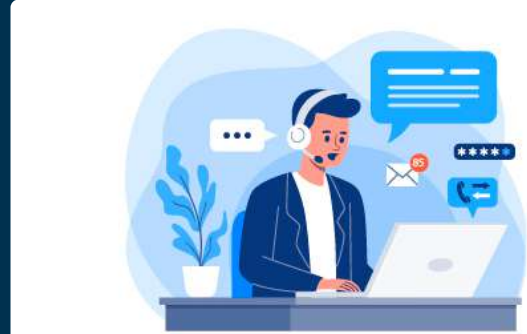

A heavy-duty rubber seal prevents draughts and water ingress. Garolla doors provide much greater insulation and weather protection compared to traditional up-and-over doors.
